

**FOR IMMEDIATE RELEASE**

October 13, 2020

**ANGELE DAVIS NAMED CEO OF G2 NET-ZERO LNG**

G2 Net-Zero LNG Chairman Chas Roemer today announced the appointment of Angele Davis as G2's new CEO. Tom Hudson, G2's former CEO, will stay on as a senior advisor to Roemer and Davis.

"Tom was pivotal in getting G2 to the position where we are poised to be the world's first net-zero emissions LNG industrial complex," said Roemer. "No one else could have gotten us so far, so fast, partnering us with a lineup of industry game-changers. He and I have been talking about this transition for a year and we believe this is the right time. We feel fortunate to have someone with Angele's skills and experience to take the project from here."

Davis, who joined G2 as Chief Financial Officer in December 2019, has 29 years in large organization management and is a former Louisiana Commissioner of Administration under Governor Bobby Jindal and former Deputy Commissioner under Governor Mike Foster.

Hudson said, "I've had the pleasure of working side by side with Angele for the past year. She has tremendous business and political knowledge and has been an exceptional asset. As we move into construction and development, she will be critical to our success."

"I'm honored by Chas and Tom's faith in me," said Davis. "At G2, we're revolutionizing the industry. Our points of distinction – an ability to produce net-zero LNG from reservoir to dock, a first-class leadership team, possession of the best remaining site in the Gulf of Mexico, and our commitment to both community and social equity – mean we will demonstrate to the world that LNG can be both clean and profitable."

"I am delighted to hear that Angele has been named CEO of G2-Net Zero," said Donald T. 'Boysie' Bollinger, former Chairman and CEO of Bollinger Shipyards and current Chairman of Bollinger Enterprises. "Turning an innovative idea into a profitable, innovative business reality requires a keen insight, a strong leadership, and a firm discipline. Angele has displayed every one of those qualities in everything she's ever undertaken. As a big fan of Angele's, and an investor in G2, I am thrilled with this announcement. I think it represents a significant next step for G2."

The G2 Net-Zero energy complex – a venture of Chas Roemer Innovations – will be the first to deliver a profitable portfolio of uniquely differentiated energy products while capturing the majority of greenhouse gas emissions. Using innovative technologies provided by Siemens, NET Power and 8 Rivers, G2 will overcome one of the biggest challenges to the future of fossil fuels.

Roemer continued, "G2 is on an accelerated development schedule. While other companies are slowly announcing their plans for the next three decades, [G2 Net-Zero LNG](#) will be capturing the majority of our emissions while producing net-zero LNG by 2027. Angele is the one to lead us there." \_

-

Stephen Waguespack, the president and CEO of the Louisiana Association of Business and Industry, said, “I commend G2 for choosing Angele Davis for this position. She is a smart, savvy, detail-oriented leader who knows how to drive performance and achieve excellence. Time and time again throughout her career, she has stepped up to take on big roles and deliver successful outcomes.”

Hudson led G2 from its inception in 2015 through its transition from a more traditional LNG model into a cutting-edge pioneer in emissions-capture and production of clean LNG. He put together the team that includes Siemens, NET Power and 8 Rivers, acquired the Calcasieu Parish site, and brought in expert advisers like Dr. Ernest J. Moniz, former U.S. Secretary of Energy, to ensure G2’s vision.

“I’m extraordinarily proud of what we’ve accomplished,” said Hudson. “I enjoy working with Chas, Angele and the leadership group we’ve put in place.”

### **Angele Davis Biography**

Angele Davis is the Chief Executive Officer of G2 Net-Zero LNG, a Louisiana-based LNG that is building the world’s first net-zero natural gas liquefaction export complex. The complex will be the first to deliver a portfolio of uniquely differentiated energy products while achieving net-zero greenhouse gas emissions from the producing reservoir through to the ship at the loading dock.

She previously served as Louisiana’s Commissioner of Administration, the chief financial officer and chief administrative officer for the state under Governor Bobby Jindal. As Commissioner, she served as Chair of the Revenue Estimating Conference and Interim Emergency Board. She served on the Bond Commission, Cash Management Review Commission, and the Louisiana Commission on Streamlining Government. She served as Deputy Commissioner of Administration for Governor M.J. “Mike” Foster, Jr.

Angele has over twenty-nine years of industry experience in organization management and global management consulting. She also has extensive experience in the private sector as a highly-coveted advisor for start-ups, local businesses, and Fortune 500 companies— having consulted with numerous clients throughout her career in industries including public finance, government, environmental technology, coastal protection and restoration financing, construction, health information technology, retail, and transportation.

She served as Vice President of Strategic Programs for a worldwide infrastructure and technical services company, where she was responsible for identifying and evaluating acquisitions, business partnerships and alliances, business development tactics and capitalization, and overseeing strategic planning.

She is an expert in public-private partnerships and well respected for both her administration and finance skills. She most recently was elected to Chair the LWCC Board, an A-rated private mutual workers' compensation insurer.

She was recognized by the Reason Foundation as a 2009 Innovator in Action for "playing a central implementation role in Governor Bobby Jindal's wide-ranging efforts to streamline the state bureaucracy." She is a recipient of the Baton Rouge Business Report's 2006 Influential Women in Business Award and also received the publication's "Top 40 Under 40" Award. She was named "Louisiana Outstanding Young Woman," "Baton Rouge Outstanding Young Woman," and graduated from the Greater Baton Rouge Leadership and Louisiana Leadership programs.

She has authored several publications and is the primary researcher and co-author of *The New Louisiana Purchase: Building Trust with Sound Coastal Investment Policies* (Public Affairs Research Council, 2016) and co-author of *Emerging Issues in Government Financing* (Aspatore Books, June 2009), having written the chapter, "Meeting State Fiscal Challenges with Reform."

During Hurricanes Katrina, Rita, Gustav, Ike, and the BP Oil Spill, Angele served on the Unified Command Group, the strategic decision-making body for emergency and disaster response in Louisiana, with the Governor serving as the unified commander. Immediately after Gustav and Ike, Angele was tasked with briefing President George W. Bush on the economic impact of the hurricanes. In her capacity as Board Chair of the Catholic Charities of the Diocese of Baton Rouge, she helped lead the agency's response and recovery efforts for the Great Flood of 2016. Post-disaster, she was invited to participate in the United Nations panel on advancing public-private partnerships.

Angele is Chair of the Board of Directors of LWCC, Trustee of Spring Hill College Board, and also serves on the college's National Alumni Association Board. She is a parishioner and volunteers at St. Joseph Cathedral in Baton Rouge, Louisiana, and was recently honored with the Bishop's Award for her service to the parish, including homebound Eucharistic minister and her work with Sanctuary for Life, a home for pregnant, unwed women.

She was awarded a basketball scholarship to attend Spring Hill College and graduated with a BA in Communications and earned her MBA from Louisiana State University.
